# WATERNETIC

Waternetic is an all-in-one digitalized water system to make transaction easier and faster. This Application aims to provide digital system in a private subdivision for smoother transaction than usual. Conserve energy and effort.

70 % OF WATER IN PHILIPPINES WASTED

90.09 LITERS PER DAY

## PROBLEMS

Water consumption awareness is one of the biggest problem that we faced globally. According to DENR that 70% of the country's available water of 160 billion cubic meters per year is wasted or lost. Each individuals can consume for atleast 90.09 liters per day.

The awareness of the water consumption is one of the issues that **waternetic** wanted to address. We are now suffering for climate change. Each little water consumption awareness of each individual, if we merged it together it will create a big impact to help our biodiversity.

13 CLIMATE ACTION

6 CLEAN WATER AND SANITATION

50+ Private sites/subdivision

500+ Homeowners

60% Manual work

**Subido, L.K.** conducted a survey here in Davao city that there are more than 50 private sites and subdivision located in the city with almost 500 homeowners, but there are still 60% of employees using manual work including the water meter reader here in our subdivision. (Workplace communication statistics, 2021)
